SKILLS

Languages:
- Java
- JavaScript
- HTML/CSS

Others:
- Git
- React.js
- Spring Boot
- RESTful API
- JUnit/Mockito
- Jest/Enzyme
- Maven
- MySQL

EDUCATION

Bachelor of Science / Computer Science

Georgia State University

Atlanta, GA

Graduation – May 2019

Computer Science graduate with a strong foundation in Java Object-Oriented programming and experience with utilizing multiple frameworks to build front & back-end web applications. Familiar with performing non-technical roles in analytics and project planning in an Agile/Scrum environment.

EXPERIENCE

SOFTWARE ENGINEER

Cerner, Kansas City, MO / May 2019 – October 2019

- Perform front and back-end implementations on the Process Auditor Checker management web application to track associates' progress during onboarding training.
- Utilize JPA to perform CRUD operations on cohorts management and use Spring Boot features to create RESTful services.
- Conduct unit testing with JUnit assisted by Mockito to perform mocking and stubbing.
- Use the React.js framework to isolate functionalities through various components and perform JavaScript testing with Jest and Enzyme.
- Improve application accessibility by adding localization using React-Intl.
- Work on registration features in Millennium, Cerner's core application which uses Java and SWT for its front-end framework.
- Debug and modify existing codebase to correct errors and improve the overall workflow of Millennium.
- Collaborate with senior engineers to modify existing tech design for implementing defect fixes to meet the client's expectations.

SOFTWARE DEVELOPMENT INTERN

UPS Capital, Atlanta, GA / May 2018 – August 2018

- Migrate operational databases from SQL Server Management Studio to Master Data Manager to establish a centralized data hub for data consolidation and standardization.
- Automate data collection on web traffic for ParcelPro.com and perform audience analysis for future page redesign by implementing page tracking using Google Analytics

PROJECTS

Personal Kanban Tool / *November 2019 - Ongoing*

- A full-stack project management web application with JIRA's style Kanban board to assist teams in visualizing various stages of project progress.
- Java back-end with Spring framework utilizing REST API and React.js front-end with Redux for state management.
